## Tell us what you think

We're committed to engaging with the local community and welcome any questions via email or through the 'Contact Us' section on our website.

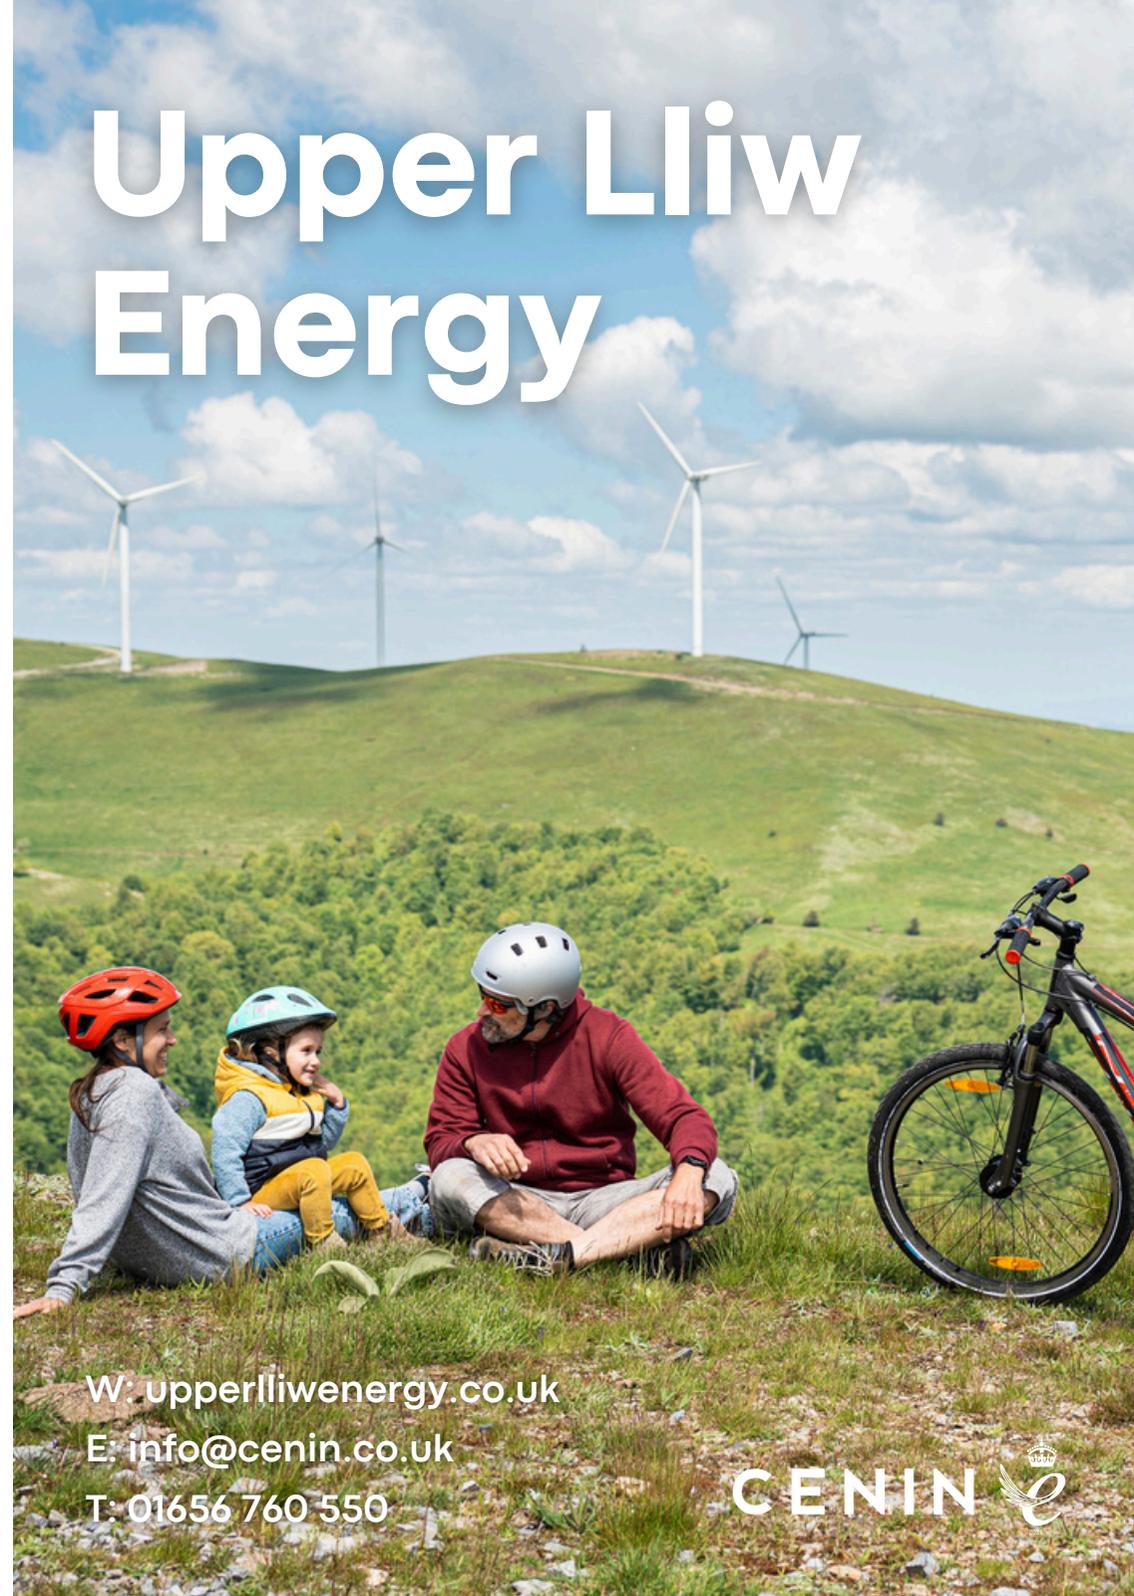

All feedback gathered throughout the consultation process will be used to shape our proposals, ensuring they bring maximum benefit to the local area.

We would also welcome contact from any local individuals or groups looking for support.

CENIN 

We are CENIN, a Welsh-based, family-owned business that believes in creating a cleaner, more sustainable future through the development of integrated energy systems.

Our innovative approach to creating our first integrated energy system at Parc Stormy was recognised with the Queen’s Award for Sustainable Development. Now we are using that experience to bring forward our plans for **Upper Lliw Energy**, a state-of-the-art scheme that will produce clean, green electricity and bring a range of opportunities to the local community.

As we face the significant challenges of energy security and climate change, projects like this are essential, providing crucial economic and environmental benefits, and helping Swansea Council meet its goal of becoming a net carbon-neutral authority by 2030.

Further information about our plans will be shared over the coming months and we would welcome input from the local community in shaping these proposals. You can find details of how to contact us on the front of this booklet. Our proposals will:

-  **Reduce the amount we pay for our energy over the long-term**
-  **Address energy shortfalls as we transition to an electric powered transport system**
-  **Increase energy security by reducing our reliance on imported oil and gas**
-  **Reduce carbon emissions that will help Swansea & Wales reach their net zero ambitions**
-  **Create the opportunity for high energy users and industries to connect directly to cheaper, greener, locally produced power**

## The Opportunity for Wales

We believe that the transition to renewable energy is essential for ensuring a sustainable, secure, and healthy future, creating the Wales we want for generations to come.

Scan the QR code to find out more about our vision of a cleaner, greener Wales...

## Community

Central to all of the projects we undertake is a commitment to ensuring we provide benefit to the communities in which we operate.

This includes supporting local clubs, groups and associations that support community well-being, and where possible utilising local products and services.

## Education

We believe that helping future generations understand the need for changes in the way we live is essential.

As part of our commitment to help understand this need, we will be offering all Year 6 pupils from schools within 10km of Upper Lliw Energy a free educational visit to our Parc Stormy HQ in Bridgend, as well as covering any transport costs.

## Environment

We understand the natural environment and every site we work on is carefully assessed before any work starts in order to create a bespoke environmental stewardship plan.

Nature works at its own pace and there are no quick wins, which is why our projects allow this important stewardship to go on for the lifetime of each scheme.

## Project Timeline
